

Announcement: Electric Micro-Mobility Safety Workshop

The Hiroshima University Smart City Co-Creation Consortium^{※1} has deployed electric micro-mobility vehicles on the Hiroshima University Higashi-Hiroshima Campus, in the Shitami area of Higashihiroshima City, and around JR Saijo Station, with the field trial starting on November 2 this year.

This trial aims to verify whether electric micro-mobility can serve as a sustainable mobility solution that improves transportation convenience for students, residents, tourists, etc., while addressing traffic challenges in Higashihiroshima City.

To ensure safer use of these electric micro-mobility vehicles, we will hold the safety workshops as follows.

◎ Workshop Details

➤ Date & Time: December 2 (Tuesday)

<Please enter the venue before the start time.>

- 1st session: 10:30–11:20

- 2nd session: 12:10–13:00

- 3rd session: 14:35–15:25

(Each session: 30-minute lecture + 20–60 minutes hands-on riding training※)

※Duration of hands-on training may vary depending on the number of participants

➤ Location:

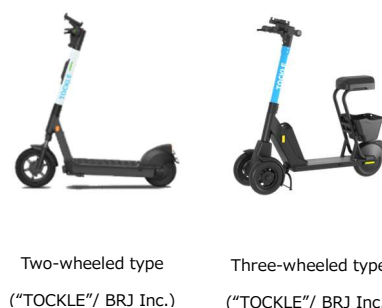

- Lecture: Student Exchange Lounge (1F, University Hall Building)
- Hands-on training: Open space next to the University Hall Building
(Please see "E16": [Hiroshima University Campus Map higashi_hiroshima](#))
- Vehicles used: Two-wheeled type, seated three-wheeled type

➤ Fee: Free

➤ Registration: Not required

➤ Other notes:

- (1) The workshop will be held even in case of rain (covered area available for riding training)
- (2) Helmets are provided for the practical training.

※1) The "Co-Creation Consortium" is an organization established in March 2022 under the Town & Gown concept, in which Hiroshima University and Higashihiroshima City collaborate to achieve regional revitalization by integrating educational/research resources with administrative resources. Currently, 18 private companies participate, working on various demonstration experiments to implement a smart city around Hiroshima University using corporate knowledge and technology.
