Your "door" to fostering new friendships and making student life more convenient!

The first step is this app!

## 1 Find circles of interest and new friends.

The "Community" and "Event" pages allow you to find and send out information about circles and events.

With a single tap, you can add circles and events to your favorites, and the comment function allows you to enjoy communicating with new friends.

## 2 Information for you is automatically displayed.

Information is customized according to your most frequently viewed pages, so that information for you is displayed on the top screen.

You can depend on the AI to automatically display important announcements and information you want to know.

## 3 Receive coupons for student life.

Coupons for special deals at on-campus and off-campus stores are distributed on an irregular basis. Each coupon can be used up to once by presenting the coupon screen.
