

Purpose of the Student Plaza

The Student Plaza has been established with the following 2 main purposes in mind.

The first is to change the current system of student support into a system where students can participate in university management through their own activities as well as voicing their ideas and suggestions, in addition to providing university service and support for the various issues and problems which confront HU students.

Together with creating a space where students and academic faculty can come together, as opposed to the old system of service counters, we are also discussing and preparing to hire students (including international students) to work part-time inside of the university management support system.

The second is to provide a place for student interaction for Japanese and international students that spans across different faculties and graduate schools.

Together with building a singular system to provide the different types of existing services to both Japanese and foreign students by concentrating all of the student service counters in one place, we are also working to build an environment where academic faculty can interact with students and support the promotion of intercultural exchanges.

From here forward, I would like to build a Student Plaza for the students, by the students based on your suggestions, ideas, opinions, and requests.

Kiyoshi Yamane, Chief Manager
Student Support and Planning
Education Office
